Pay

CountR – the solution provider for casinos

CountR is a worldwide leading developer for cash handling and cash management solutions for casinos. We support our clients in streamlining their cash processing, increasing security, and automating work processes.

Boosting revenues while cutting costs – it can be done!

Long lines at the cashiers mean increased machine idle time – and that hurts both your bottom line and your customers' satisfaction. Plus, all over the world, coinless and cashless gaming is gaining ground against the traditional coin-based systems.

CashIO: Cash It Out is the solution

Since the CashIO automates cashier operations, it not only reduces cash handling costs but also offers players improved service.

- Streamlined processes, lower costs

- Improved customer service
- Increased gaming time
- Greater security

CashIO is a versatile, flexible system with all the features needed to support casino operators at every level – right up to cashless gaming. It even allows the simultaneous use of banknotes, coins, and cashless media such as tickets and cards (TITO – ticket-in / ticket-out).

The system offers maximum convenience and outstanding ease of use for customers.

There are two main applications for CashIO Gold:

- Ticket redemption and issuing (TITO)
- Card redemption and charging

The popularity of coinless and cashless gaming has been introduced into VLT applications:

Ticket redemption and issuing

Increasingly, coins are being replaced by tickets as the gaming currency of choice (TITO – ticket-in / ticket-out).

The gaming machine issues players a ticket representing their winnings. With the ticket, they can either move on to another slot machine or go to the CashIO, where they can collect their winnings without standing in line at the cashier's cage.

CashIO is able to print tickets even for the coin change during redemption transactions. This allows optional coinless operation at the CashIO.

Card redemption

Another recent trend is the use of cards as a gaming currency for machine-based gaming.

CashIO can charge up magstripe and RFID cards with cash. Customers insert banknotes into the terminal; the guest then inserts the card into the card reader. The paid-in amount is then credited to the player/ card account.

This allows cardholders to play at any appropriately equipped machine, with winnings credited to the card. Before leaving the casino, the balance can be redeemed from the CashIO in cash, either partially or in one lump sum.

No matter what gaming machines you currently use or plan to use, CashIO is already designed to support you.

CashIO – your ace in the hole

- Redeems and prints tickets (TITO)
- Re-charges cards
- Redemption of cards
- Pays out card balances down to the cent with banknotes and coins
- Breaks large denomination banknotes into several smaller ones (configurable)
- User instructions provided via touchscreen with multiple language options

CashIO Gold Modules

Forward-looking, secure investment

- Leverage these cutting-edge features today in your existing environment.
- CashIO uses a modular design for maximum application flexibility and ease of upgrading.

Benefits for casinos

- Improves customer service
- Automates cashier tasks
- Players can spend more time at the slot machines
- Cuts down on waiting times at the cashier
- Maintains customer statistics
- Provides a complete audit trail to capture cash movements and system functions
- All transactions are monitored and verified by the casino online system
- Configurable access levels for casino personnel
- Configurable access levels for casino personnel
- On-screen help

Secure enclosure

- Protects cash in a safe

Banknote / ticket insertion

- Accepts all major currencies
- Authenticates banknotes
- Accepts all standard tickets (TITO)

Receipt printer

- Prints receipts to specifications

Banknote dispenser

- All major currencies, up to four different denominations
- Integrated reject compartment
- Stores banknotes in secure enclosures

Card functions

- Supports and accept magstripe and RFID cards

Coin insertion

- Connect a coin counting machine with the terminal

Coin dispenser

- Up to four different coin denominations

Device management and user support

- Standard PC with Linux operating system
- Link to casino online systems
- Personalized access management (configurable)
- Interfaces with ART software

CashIO Gold Technical Data

Dimensions (H/W/D)

- Approximate 1,923 x 430 x 682 mm

Weight

- Approximate 250 kg

Power supply

- 110-220 V, 50/60 Hz

Security features

- Safe
- Banknote authentication
- Reject compartment
- Video surveillance (optional)

PC

- Industrial PC
- Linux operating system

Printer

- Ticket printer

Monitor

- 24" or 32" Touchscreen

Banknote / ticket insertion

- Cash/Ticket boxes holds up to 1,000 banknotes

Banknote dispensing

- Up to 200 banknotes per payout, depending on currency and banknote quality

Banknote dispensing capacity

- Up to 4 denominations with up to 1,500 banknotes each, depending on currency and banknote quality

Coin dispensing capacity

- Up to 4 denominations with up to 1,000 coins each, depending on coin size

System access

- Default: All components are accessible from the front

Approvals

- CE, UL
- RoHS-compliant
